

Rolltone 20

ROLLTONE 20 is latex primer, produced according to the technical specifications of CMB in compliance with the Ministerial Resolution No. 181 of 1996.

General Specifications:

- ROLLTONE 20 is economical matt emulsion paint, used as an undercoat of walls or final coat of ceilings, and manufactured from vinyl acetate co-polymer resins and highly-smooth filling materials.

Uses:

- ROLLTONE 20 is used for new and old, cement and gypsum surfaces.

Technical Characteristics: (at 25 ° C):

| | |
|----------------------|---|
| Color: | White |
| Density: | 1.62 ± 0.03 kg/L |
| Initial Drying Time: | 20 - 30 minutes |
| Final Drying Time: | 60 minutes |
| Dilution: | Diluted according to need with pure water |
| Consumption Rate: | 4 m ² / kg |

How to Use:

- Surfaces should be cleaned well from dust, oils, grease or any other contaminations.
- Cavities should be filled and surfaces must be smoothed using one or more coats of wall putty.
- Paint one or more coats according to the surface permeability.
- To improve the surface, you can paint a coat of water-based varnish as a final coat

Storage: For one year under proper storing conditions.

Packs: 10 kg, 18 kg.
