

Coat Stripper

COAT STRIPPER is a highly-efficient compound to remove different paint and varnishes.

Components:

- **COAT STRIPPER** is composed of organic solvents and removers to get the best effectiveness.

Advantages:

- Easy to use (one compound).
- High strength in removing paints (Duco – Lacquer – Varnish – Acrylic – Polyurethane – Epoxy) as well as removing water-based (latex) paints.

Technical Characteristics: (at 25° C

Appearance:	Thick liquid
Color:	Transparent
Solid Content Ratio:	4%
Density:	1.11 ± 0.02 kg / liter

Application Method:

- Apply a thick coat using a brush on the paint surface to be removed. Leave it for 2 – 5 minutes in case of lacquers, duco, oven paint and water-based paint, and 5 – 15 minutes in case of epoxy and poly-urethane paints.
- Soft paints are removed with a putty knife. Repeat until the paint layer is removed altogether.
- The surface should be washed with abundant water and left to dry before applying new paints.
- Clean tools with normal water.

Storage / Shelf life: For one year in tightly-closed packs under proper storing conditions away from any source of heat.

Packs: Bottle 390 gm.
Carton 12 Bottle.
