

Release Agents Compounds For Formworks

Curasol 11

Separating Compound Between Old and fresh Concrete.

Description:

- **CURASOL 11** Liquid compound to be applied twice on top of old concrete to act as a separating membrane between old and new concrete elements.

Fields of Use:

- Factories of concrete prefabricated units and left-slab structures.

Advantages:

- Saves time in production process.
- Low cost.
- Easy to use.

Technical Data :(at 25° C)

Density	0.82 ± 0.01 kg/l
Rate of use	100 – 150 gm/m ² , per coat.

First Coat:

- By spray or brush on top of the lower concrete floor which must be clean. It may be applied directly after casting, thus serving additionally as a curing compound.

Second Coat:

- By spray or brush after not less than 12 hours of applying the first coat.
- After being dried, new concrete may be casted.

Safety Precautions:

- Wear gloves and goggles.
- Skin and face contamination should be washed with water and soap.
- Accidental splashes to eyes must be rinsed with clean water and then report to an specialist.
- Do not eat and smoke during use.

Storage:

- 5 years under suitable storage conditions.

Packages:

- 20 litre and 200 liter.
