

KEM NET

Fiber Glass Tape For Joints and Cracks Repair .

Description:

- **KEM NET** is an alkali resistant fiber glass mesh tape for joints , cracks and holes repair.
- **KEM NET** is easy to fixed on the different surfaces by means of **ADDIBOND 65** slurry .

Fields of Use:

- Joints between concrete skeleton and brick walls.
- Cracks repair that may be happened in plastering.

Advantages:

- High resistance to alkalis .
- No rust .
- High tensile strength .
- Prevents forming cracks .
- Indoor and outdoor use .
- Easy to use.

Technical Data : (at 25 °C)

Thickness	0.75 mm
Weight	110 gm / m ²
Fracture strength	800-1100 N / 50 mm

Directions for Use:

- Joints between concrete and bricks should be cleaned correctly.
- A 5 cm wide from each side of the crack width should be removed from plastering .
- A suitable putty layer, composed of sand and cement (1:1) + **ADDIBOND 65** and water (1 : 3) well mixed to acquire a slurry that should be applied then fix the **KEM NET** directly and before plastering .

Dimensions :

Rolls width : 10,15,20 cm.
Roll length : 30,50 m.
